

Have you seen the Carbon Fire 10 Disruptor? Could your Squad use one?

Here's how you can get one (retail value \$7000)

The mission of the USBTA is to assemble a community of operators, academics, equipment suppliers and innovators and provide a forum for them to share resources, ideas, and experiences in order to establish a network for collaboration in current and future endeavors to strengthen the community and enhance public safety.

Carbon Fire is a great partner of the USBTA, and the owner has generously donated an entire kit to us to use in a raffle. See more at: http://www.eod-technologies.com/product_CarbonFire10.html

So, here's what we have decided to do: We will assign a raffle ticket to every new member, with a paid registration (\$25.00) between March 25, 2018 to August 23 2018 (After completion of the Bomb Squad Commanders Conference). The Drawing will be done the week of August 27th. The complete Carbon Fire 10 EOD Ops Pak III kit will be presented to the winning ticket's parent Unit / Bomb Squad.

How do you increase your Squad's chances? The answer is obvious, get the Department to sign your whole squad up with an annual USBTA membership.

It's easy, register your bomb technicians at: www.usbta.us/join
