THE KABOOM BOYS

HONORING THE HEROES WHO DEFUSED HISTORY

The Kaboom Boys follows Edward Hume and an extraordinary team of World War II Explosive Ordnance Disposal technicians who volunteered for one of the deadliest assignments of the war, defusing unexploded bombs in the heart of Nazi-occupied Europe.

With survival often measured in weeks, their mission took them from the English countryside to the perilous shores of Mont Saint-Michel, where every bomb diffused meant countless lives saved and every mistake meant devastation. This is a story of courage, sacrifice, and humanity under impossible pressure—one that deserves to be preserved and shared.
