

FOCUSED TECHNOLOGY TRAINING EXERCISE

3-D Printing for Bomb Technicians

Important: This course is not intended for intermediate or advanced “power users” of 3D printers.

COURSE OVERVIEW

This will be a 3-day introductory level course focused on the practical implementation of FDM 3D printing programs in military and public safety bomb technician units. The objective of this course is to enable units and departments to successfully stand up and sustain a basic 3D printing program, leveraging additive manufacturing to:

Drive efficiency Foster innovation Reduce logistics costs
Improve responsiveness to emerging operational requirements

AUGUST 25 - 27, 2026

*Location: United States Bomb Technician Association
4450 Indian head Highway, Indian Head, MD 20640*

Offered for: Active Duty Bomb Techs

Free for: Academia & Industry to observe
